

TEMARIO

 Thymeleaf es un motor de plantillas, el mismo es usado para generar vistas a partir de plantillas HTML, se integra perfectamente con Spring MVC, soporta internacionalización, el uso y validación de formularios, Thymeleaf es una alternativa moderna, rápida y limpia en comparación con las tradicionales vistas JSP + JSTL.

- Instalación con maven:
- <dependency>
 - <groupId>org.thymeleaf</groupId>
 - <artifactId>thymeleaf-spring5</artifactId>
 - <version>3.0.9.RELEASE</version>
- </dependency>

 Para poder utilizar el motor de plantillas Thymeleaf en una aplicación web Spring MVC necesitamos agregar los siguientes beans a nuestra configuración.

```
@Autowired
private ApplicationContext applicationContext;

@Bean
public SpringResourceTemplateResolver templateResolver() {
    SpringResourceTemplateResolver templateResolver = new SpringResourceTemplateResolver();
    templateResolver.setApplicationContext(applicationContext);
    templateResolver.setPrefix("/WEB-INF/views/");
    templateResolver.setSuffix(".html");
    return templateResolver;
}
```

```
@Bean
public SpringTemplateEngine templateEngine() {
    SpringTemplateEngine templateEngine = new SpringTemplateEngine();
    templateEngine.setTemplateResolver(templateResolver());
    templateEngine.setEnableSpringELCompiler(true);
    return templateEngine;
 * STEP 3 - Register ThymeleafViewResolver
@Override
public void configureViewResolvers(ViewResolverRegistry registry) {
    ThymeleafViewResolver resolver = new ThymeleafViewResolver();
    resolver.setTemplateEngine(templateEngine());
    registry.viewResolver(resolver);
```

 Incluir funcionalidad en archivos html, incluyendo el namespace xmlns:th="http://www.thymeleaf.org"

- Acceso a atributos agregados en el controller:
 - -
- Acceso a llaves en archivos properties:
 -

- Referencias a elementos físicos (archivos js, css, imágenes)
 - th:href="@{/resources/css/bootstrap.min.css}" rel="stylesheet">
 - <script th:src="@{/resources/js/jquery-1.11.1.min.js}"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></scri
 - <a th:href="@{/formatos/xls}" role="button" target="_blank">
 - <img src="/images/gtvglogo.png"
 th:attr="src=@{/images/gtvglogo.png},title=#{logo},alt=#{logo}" />

- Condicionales
 - th:if y th:unless
 -
 -
 - - th:each="u: \${users}" th:text="\${u.name}">user name

Evaluar condicionales switch

- <div th:switch="\${user.role}">
 - User is an administrator
 - User is a manager
- </div>

- Iteraciones
 - th:each
 - - •
 - •
 - -

Formularios

- <form th:action="@{/contactos/guardaContacto}" method="post" th:object="\${contacto}">
- <label th:text="#{label.contacto.nombre}" ></label>
- Realizar binding con le propiedad del objeto
 - <input type="text" th:field="*{nombre}" />
- Errores
 -
 -
 -

- <select th:field="*{tipoContacto}">
 - <option value="">--SELECT--</option>
 - <optionth:each="tipoContactoS: \${#servletContext.getAttribute('tipoContactoList')}" th:value="\${tipoContactoS}" th:text="\${tipoContactoS}" />
 - </select>
